

PROCEDURES
Of the Employment of Multi-Tariff System of Electricity Consumption Metering for Residential Customers

Approved by the ERC Resolution No. 26
Dated 28 September, 1999
In the City of Yerevan

These Procedures shall regulate the process of the multi-tariff system employment for the metering of electricity consumption by residential customers and shall determine the terms of night-time tariff application:

1. In the multi-tariff system the power supply to residential customers shall be carried out in the following terms and conditions are met:
 - a) installation of multi-tariff electric meters meeting standard requirements and technical norms, in procedures determined by the RoA Legislation and other normative legal documents;
 - b) introduction of corresponding amendments and supplements in the acting Power Supply Agreements, associated with the employment of the night-time discount tariff;
2. Provision (purchase, state testing and installation) of multi-tariff meters for residential customers at the expense of the Suppliers shall be carried out by the company in accordance with the established timetable.
3. In the instances, when the residential customer is willing to transfer to multi-tariff billing at his own initiative, he shall apply to the Supplier in writing and perform the payment of the meter's cost. The Supplier, in his turn shall commit to installing the meter no later than one month within the payment of the meter's cost and introduction of the necessary amendments in the acting contract. The costs of the state testing, sealing and installation shall be carried out by the Supplier.
4. The cost of the meter shall be registered by the Supplier as a pre-payment for the consumed electricity and shall be reimbursed at 100 % of the monthly incoming amount for electricity consumed during the night hours, starting the end of the first year of the installation of the meter.
5. If the Customer expresses a wish to have an additional light panel of meter readings installed in his apartment (or the premises in his belonging) by the Supplier, then the Customer shall apply to the Supplier and make all necessary payments for the panel and any additional charges associated with the increase of the meter cost, which shall not be reimbursed by the Supplier.

6. The Procedures for the maintenance, operation and scheduled and unscheduled meter testing shall be established by the Legislation of the Republic of Armenia, the Power Purchase Agreement, Rules of Electricity Use and other legal acts and documents.
